

Serial No.: 09/358,280

cooling mist of water in the vicinity of a person for cooling the person when pressurized water is supplied to said spray nozzle;

D²
a clip secured to said second water conduit for attaching said second water conduit to an article of clothing of the person, whereby said spray nozzle may be positioned for providing said cooling mist of water in the vicinity of the person for hands free operation of the misting apparatus; and

a restrictive valve connected to said second water conduit for controlling flow of water to said spray nozzle.

Sub C12
11. (Twice amended) A system for cooling a person, the system comprising:
a pressurizable container for supplying water having a water outlet and an inlet for filling said container;

D³
a first water conduit for fluidly communicating water within said container to said water outlet;

means for pressurizing the container removably mounted to said inlet of said container to create a seal with said container;

a second water conduit extending from said water outlet, said second water conduit having a distal end and a proximal end, said proximal end connected to said container;
